

Product data sheet

Triflex ProMesh

Use

Triflex ProMesh is a unique, high tensile strength fabric reinforcement used in the Triflex ProDeck car park system.

Properties

- High tensile strength

Packaging

Component	Pack size
ProMesh	1m x 100m

Colour

White.

Application conditions

Refer to primer used with Triflex ProMesh.

Application method

1. Loose lay the Triflex ProMesh in the longitudinal direction of underlying pre-cast concrete elements;
2. Once the membrane has relaxed apply the specified Triflex Primer directly on top of the fabric using a squeegee pressing down to remove all creases and voids, and back rolling with a roller to ensure even coverage. Refer to specific Triflex Primer Product Data Sheet.

Note: Triflex ProMesh sides and ends must be closely butted together.

Storage

Store in a dry place and protect from moisture.

Notes

The advice we provide on the application of our products is based on extensive development work and many years of experience, and is given to the best of our knowledge. The wide variety of requirements for a building under the most diverse conditions mean that it is necessary for the contractor to test the product for suitability in each case. Triflex reserve the right to make alterations in keeping with technical developments or improvements.

Non-Triflex products must not be used with Triflex systems.

Only the most recent version of this data sheet is valid.
